-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

1. This Office Action is in response to Pre-Amendment filed on Mar 14, 2002.
2. Claims 3,5-7, 9, 11-16, and 25-26 have been amended.

***Specification***

3. The abstract of the disclosure is objected to because an abstract on a separate sheet is required. See MPEP § 608.01(b).

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-2, 5-6, 9-28 are rejected under 35 U.S.C. 102(e) as being anticipated by Soliman (6,542,743).

Regarding claims 1, 5-6, 9-28 Soliman discloses a communication system for relocating a protocol terminal point, comprising defining a protocol initialization unit containing predetermined information of a first termination point of a first protocol by first protocol (see abstract, fig.1, fig.3, elements, 100, and its description); transferring the protocol initialization unit from the first terminal point to a second terminal point by a second protocol (see abstract, fig.3, elements 100, 101 and its description); and

Art Unit: 2683

initialization based on the protocol initialization unit (see abstract, fig.2, fig.3, elements 100, 101, 300, col.5-7 and its description).

Regarding claim 2, Soliman further discloses wherein the protocol initialization unit contains state information of the first protocol terminal point (see fig.2, element 300, fig.4 and its description).

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 3-4, 7-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Soliman (6,542,743) in view of Meier (6,201,969).

Regarding claims 3-4, 7-8, Soliman further discloses all the subject matters described in rejected claims 1-2, except for the first terminal point is located at a first network element and the second terminal point is located at a second network element of communication system. However, handoff from one network to another is well known and also disclosed by Meier (see fig.1 and its description) in order to improve the telecommunication system.
